Members of the Board:

It is my duty and privilege to submit to you a report on the operation of the School for the years 1964-66.

Significant features of this report are: *The Superintendent's Report, The Business Manager's Report, General Information concerning the School and a pictorial section which shows the work of the School in pictures.*

It is indeed a pleasure and an honor to submit this report to you.

Respectfully submitted,

Ben E. Hoffmeyer, Superintendent

**OUR SYMBOL OF LIFE: THE CLOCK TOWER** has been there since the day the School opened on "Vine Hill"; its clock faces point to the next thing to be done; its beautiful symmetry is a memory that goes with us wherever we go.

Governor of North Carolina

## General Information

The North Carolina School for the Deaf at Morganton is a state supported residential school the deaf. It is located on a campus of approximately 75-acres. This campus is surrounded by farm lands that belong to the School. There is a total of 255 acres of land located on the southern limits of Morganton. The School also owns 500 acres in the South Mountains and this is the water shed area for the School.

Physical facilities include twelve buildings and ten residences. Ample playground and athletic facilities are available.

It is the purpose of this school to provide an educational program for boys and girls, who because of profound or partial deafness, are unable to profit by the instruction given in schools for hearing children. The course of instruction is intended to furnish the deaf child with as much academic subject matter as he can absorb. An Academic High School Course is offered, plus an extensive program in Vocational Education. Graduates are generally qualified in one vocation, and either get employment or go on to college at Gallaudet College, Washington, D. C. Gallaudet is the only college for the deaf in the world.

Approximately fourteen years are required to complete the high school course. Students are admitted when they are five years of age. The class size ranges from 8 to 11 per class. Individual instruction is required to establish speech and lipreading for the deaf child. Individual hearing aids are used by those who have a remnant of hearing. Powerful classroom group hearing aids are installed in twenty-two classrooms.

Pupils are grouped by achievement and age into three distinct departments: Primary School, Middle School and Upper School. Each department has a supervising teacher. The Principal is over all instruction, including Vocational Training and Physical Education.

The School considers Sunday School work part of its responsibility and all children attend. Sunday School is taught by the teachers. Approximately one-fifth are on duty each Sunday. Church service is held for children 12 years of age and over. Missionaries for the deaf preach a non-denominational sermon and use the sign language.

## **Applications and Admissions**

Applications and request for information should be addressed to the Superintendent.

Children are admitted at five years of age and above. Medical records must show that the child has a hearing loss severe enough to prevent him from attending public school. A child must have mental capacity adequate to be considered educable. Generally an Intelligence Quotient of 70 is required. Transfers from public school can be made at any time, if the child is not making progress due to a hearing loss.

## **Fees**

No tuition, room or board is charged since the School is a part of the free public school system. A school fee of \$25.00 per year, per child, is charged to cover school supplies and student activity fee.

## **New Eastern School at Wilson, North Carolina**

During the school year 1964-65, the new Eastern School for the Deaf at Wilson opened. Seventy-two younger children from the Eastern part of the state were transferred from the School at Morganton. In June of 1965 the Eastern School had an enrollment of 115 with more applications for younger children for the fall of 1965 than there was space to enroll. The 1965 Legislature was appealed to for funds to add the second phase of buildings to this school, and funds were granted. During the school year 1963-64 the School at Morganton reached a peak enrollment of 558 making it the largest school for the deaf in the United States. Even with the transfer of 72 children to the Eastern School in the spring of 1965, the School at Morganton opened in the fall of 1965 with 505 students, and a few younger children could not be entered due to lack of space for them.

The State's population has continued to increase, and all indications are that it will continue to climb; likewise the number of deaf increases. We will need to either expand the facilities at Morganton, or expansion will have to be made elsewhere in the state's facilities, especially in view of present integration which has brought additional pupils to the School at Morganton. High School pupils will continue to attend at Morganton, and all younger children from the Western part of the state will continue to attend

at Morganton. It is hoped that the second phase of the School at Wilson can be opened in the fall of 1967, and this will take care of more children from the East.

## Superintendent's Report

As Superintendent of the North Carolina School for the Deaf at Morganton, I herewith submit the Thirty-eighth Biennial Report for the years 1964-66. Enrollment for the 1964-65 school year was 492, and for 1965-66, it was 516.

There were several significant events during the biennium. One of these was the sale of 132 acres of land to be used for a Comprehensive Community Junior College. The land was sold by the School to the College for \$95,000. The School has approximately 250 acres of land remaining for future expansion when deemed necessary.

The Community College may be an asset in that it is possible that some of the older students might be able to take advanced academic and vocational training at the college in future years.

The General Assembly of 1965 appropriated sufficient funds, \$383,000 for three Capital Improvement projects on the campus: (1) A Student Union and Girls Physical Education Building was approved and an appropriation of \$305,000 was granted for it. (2) A \$60,000 appropriation was granted for an addition to the infirmary which consists of isolation wards and a playroom. (3) appropriation of \$18,000 was granted to resurface all of the roads on the campus.

The Federal Government increased the Teacher Training scholarships from five to eight at Lenoir-Rhyne College on the undergraduate level, and continued four scholarships at the graduate level at Appalachian State Teachers College. Both colleges are affiliated with the School in the Teacher Training program for training teachers of the deaf in its nationally accredited program. Appropriations for General Operation were increased and adequate funds were available to operate the school at a high level of educational efficiency.

The instructional program made significant advances. An ex-

perimental program is being carried on using the simultaneous method of speech and fingerspelling at all levels. It is an effort to bring more fluent language to the deaf child which will help him in all methods of communication; oral, speech, lipreading, writing and reading.

Mrs. Frances E. Davis, Building Principal of the Advanced Department retired at the end of the 1965 year after 42 years of service. Mrs. Jane C. Williams was elected to fill the position left vacant by Mrs. Davis' retirement. Mrs. Williams holds a B.S. degree from Duke University and a Master's degree in Speech and Hearing from the University of North Carolina. She also had 12 years of teaching experience at all levels at the North Carolina School for the Deaf, giving her an unusually excellent background for the position.

The biennium of 1964-66 saw noticeable advances in the upgrading of the educational program of the school and of its facilities. The North Carolina School for the Deaf at Morganton is highly regarded nationally and has an excellent record for preparing students for college, for employment and for life.

I consider it an honor to be of service to the State and the deaf of North Carolina.

Respectfully submitted,

Ben E. Hoffmeyer, *Superintendent*

## **Departmental Reports**

### **Household Life**

Dormitory life has received more attention in the last biennium due to a Dean of Students who gives his full-time to the supervision of counselors (houseparents) and their programs for the children during the out of school hours.

Hours were reduced by law to 40 hours average which allowed some accumulative leave pay to be paid beyond the close of school. This increased the yearly pay of the counselors.

Recruiting continues to be a problem, since most of the counselors are required to live in the dormitories and the hours are long.

Training has been planned by scheduling a full week of training during the week prior to the opening of school. This should lead to a more efficient program of counseling and upgrade the professional standards of the position.

### **Dietary**

The aim of the dietary department is to serve students and staff who live in, a well-balanced diet which comes within the budget. This has been successfully accomplished. It will be necessary to request a reasonable increase in the food budget for the coming biennium to meet the rising costs and a steadily rising enrollment.

### **Health**

The 1964-66 Biennium has found the students in remarkably good health. Epidemics of colds and such have been kept down to a minimum among the children, and the infirmary has operated well under the direction of Dr. W. H. Patton, Jr., School Physician. The \$14,000 appropriated for remodeling the bathrooms, electric and plumbing facilities at the infirmary and for putting vinyl

asbestos tile on the floors accomplished this purpose and the infirmary is now a much more modern and better arranged building. Other improvements are needed, but it is felt that they can wait for some months. The money provided for a maid to help keep the building clean has also proven a wonderful aid to the nurses and doctors and gives them more free time for caring for sick children.

All parents receive the following notice regarding medical care in a general letter sent to them at the beginning of each school year by the Superintendent:

*State law requires the following inoculations and/or vaccines before entrance: 1. Diphthria, 2. Tetanus, 3. Whooping Cough, 4. Smallpox and 5. Polio (all shots must be completed). If tonsils and adenoids need removing it must be done at home. Any other operations are to be done at home unless they are emergencies arising at the school, then the parent is contacted and requested to come to the school and make hospital arrangements if possible. Eyes are to be examined and glasses fitted if needed before coming to school. Teeth examined, and all dental work done before entrance. In emergencies only does the school have glasses fitted and dental work done, then parents are responsible for the bills.*

The School has an Infirmary for the care of minor sickness. There is no charge to parents for this service or for drugs used, except especially prescribed drugs. If a child is sick enough to go the town hospital, parents must take care of his expenses there, just as they would have to do if the child lived at home. If a parent does not wish a child to play certain games, the Superintendent should be notified in writing. The School assumes no responsibility for injuries sustained in games. It does exercise every possible precaution.

### **Maintenance Department**

The Maintenance Department under the direction of Engineer, Mr. Fred Rusmisell has accomplished with its own force more than we ever hoped they could do in the way of general upkeep, and painting. The grounds have also been greatly improved in the last biennium.

### **Laundry Department**

Due to increased enrollment this department has been enlarged somewhat in the past biennium. Under the management of Mr. C. L. Street it has turned out good work and is now fully meeting the needs of the institution. Equipment in general is adequate. This department is considered semivocational as a part of students training.
